Office Action Summary

Application No.

10/725,219

Applicant(s)

GEORGE, GLEN R.

Examiner

Chapman E Jeanette

Art Unit

3635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-9 is/are allowed.
- 6) ☒ Claim(s) 10,11,14-17 and 19-38 is/are rejected.
- 7) ☒ Claim(s) 12,13 and 18 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 4/5/2004.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application (PTO-152)
- ☒ Other: patent copy with annotations.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 USC 102 that form the basis for the rejection under this section made in this office action.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-11, 14-15, 26-27 are rejected under 35 U.S.C. 102(b) as being anticipated by KEMP (4704828). Kemp discloses a modular window well comprising:

- The vertical wall members 10 include first and second spaced apart end portions; each end includes a connecting structure;
- the vertical wall member having a central portion horizontally spaced from the first and second ends defining a central space bounded by the end portions and the central portion; see annotations on patent copy;
- first and second extension wall members 14 having a first side edges secured to the end portions;
- each extension wall member further including second side edge portions having a connecting structure 16/nails/screws for securing the extension wall to the building foundation;
- elongate channel 12 to provide stiffness n the vertical wall member and also provide stops adjacent each side edge to engage another identical window well nested within;

- the end portions of the vertical wall members 10 and the first and second extensions comprise flanges 14 having a plurality of openings 16 therethrough;
- the vertical member 10 has a U-shaped in plan view;
- a plurality of wall members 10 are vertically stacked;
- a barb 22 adjacent each side edge and an opening 24 adjacent each side edge configured to receive the barb of an identical window well to interconnect window well or vertical members in a stacked configuration; see figure 2

35 USC 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, 28-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kemp in view of Poole (6484455). Kemp shows radiused wall but lacks the central portion of the vertical wall member including transversely extending portions forming a step. Poole discloses this transversely extending step on the window well. Poole also discloses the transversely extending portions having spaced apart upper and lower walls/webs defining a gap and forming an end edge of a step. See figure 10. the upper and lower webs extend generally horizontally and extend inwardly towards a central space. See figure 10It would have been obvious to one of ordinary skill in the art to

modify Kemp to include the steps with the structure of Poole in order to provide a means of escape via the window well and to form steps which are supported by the earth.

Claims 17, 19-20, 32-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kemp in view of Gavin. Kemp lacks the ribs extending or interconnecting the upper and lower walls. Gavin discloses the ribs 26 interconnecting the upper and lower walls. It would have been obvious to one of ordinary skill in the art to modify Kemp to include the ribs to stiffen and strengthen the vertical structure as shown by Gavin.

Gavin shows a web with a boss having a cavity adapted to receive a threaded fastener. See column 5, lines 10-30. It would have been obvious to employ this additional means to secure the vertical wall members together. For the limitations of claims 36-38 see above. Gavin also shows the rib 24 defining an outer surface and including a cavity, not shown, for receiving a screw. The opening extends through the upper wall of the transversely extending portion 42.

Claims 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kemp in view of Bradley et al (6773206).

Kemp shows offset portions but not on the offset portions on the flanges. Bradely et al figure 8 shows these flanges in order to neatly stack members minimizing the appearance of seams. Bradely et al also includes the mating wedge/openings on vertically stacked walls. One of ordinary skill in the art would have placed the mating connectors and tapered portions at any location needing a connection point. It would

have been obvious to one of ordinary skill in the art to modify the end portions to include tapered ends with mating wedge/openings in order to seamlessly mate with the vertical member above or below.

For the limitations of claims 22 see above.

Claims 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kemp in view of Bradely et al as applied to claim 21 and further in view of Poole.

Poole discloses the structural foam material for a window well. It would have been obvious to one of ordinary skill in the art to construct Kemp of the foam material in order to provide a light weight easy to construct window well.

Claim 12-13, 18 are objected to as depending upon a rejected base claim but would be considered as allowable if amended to include the base claim and any intervening claims.

Claims 1-9 are allowable over the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chapman E Jeanette whose telephone number is 703-308-1310. The examiner can normally be reached on Mon.-Fri, 8:30-6:00, every other fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Friedman Carl can be reached on 703-308-0839. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
